Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for killing insects, does not reasonably provide enablement for controlling insects. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. How does an artisan in the field control insects?

Allowable Subject Matter

Claims 1-8,12-16 are allowable. The prior art does not teach or suggest the invention having a compound bearing a substituent off of the Nitrogen atom comprising O or S and Si.
